Noon Golf Fact Sheet

About Noon

Noon is an ad-free golf app that brings GPS yardages, a live group scorecard and automatic side-game scoring together on iPhone and Android.

Golfers can start a round, invite friends with a link or QR code and keep a shared scorecard as they play. Noon uses those scores to keep standings in games like Skins, Wolf and Nassau. After the round, players can review their stats and share the card.

Product facts

- **Golf GPS and maps.** Check front, middle and back yardages and distances to hazards. Plays-like yardages and green reads depend on available course, terrain and weather data.
- **Watch support.** Check yardages, enter scores and follow game status on compatible Apple Watch and Wear OS devices.
- **Noon Index.** Follow an unofficial handicap estimate based on eligible Noon rounds.
- **Round access.** Play one free round per month with every feature. Buy additional rounds individually or subscribe to Noon Unlimited.
